CAREER OBJECTIVE

I'm a fan of technology who seeks to continue his professional development somewhere where he can put my knowledge into practice and offer me the opportunity to grow in the workplace.

TECHNOLOGIES

- .Net / .Net core
- C#
- Microsoft dynamics
- React
- Angular
- TypeScript
- JavaScript
- Node JS, Express js
- Web development (Html,css,sass)
- Sql server
- Oracle
- Mongo Db
- Python
- Blazor
- Go
- Redis

TYPE OF TECHNOLOGIES

- Asp .Net
 - MVC
 - Web Api
 - JsonResult
 - Ajax
 - Api
- .Net Framework v(4,4.3,4.5,4.7)
- .Net Framework core
 - Rest api
 - microservice
- Daper
- Azure
- Azure devOps
- Azure function
- Ci/CD
- Data BaseProject
- Unit Testing (MS)
- Docker
- Kubernetes
- Etl's
- Kibana

WORK EXPERIENCE:

Coder house

(11/2023 - Present) as deputy tutors

Responsibilities: Currently, I serve as an assistant tutor in a Node.js backend programming course. As a substitute teacher, I am responsible for conducting classes in the absence of the main instructor and addressing questions and concerns from students. Additionally, I handle grading challenges and final projects submitted by students.

technology stack: Node js, nodemon, mongo db, react, angular, git hub actions, git hub pages.

Trick Studios

(01/2024 - Present) as Sr Full stack Developer

Responsibilities: As a Full Stack Developer at Trick, I work on an exciting project within the gaming industry. Our main responsibility is to deliver new features and enhancements to the game. We develop using .NET 6 and utilize Blazor for the game's back office development.

technology stack: .Net 6, .net Core 3.1, Blazor, Sql server, Azure, git hub actions.

Coelsa

(03/2023 - 01/2024) as Developer SR Analyst

Responsibilities: As a Senior Development Analyst in the Debin team at Coelsa, I led the evolutionary development of various financial products and actively participated in system analysis. Additionally, I provided continuous support and facilitated the learning of other developers.

technology stack: .Net 6, .net Core 3.1, Angular v12, Sql server, Azure

Bank Supervielle

(06/2022 - 03/2023) as Tech leader

Responsibilities: As the technical leader of the insurance team at Banco Supervielle, I supervised and managed the activities of the technical team members, ensuring successful project deliveries. Additionally, I was responsible for implementations and collaborated with the architect to identify the best options offered by the company's archetypes.

technology stack: .Net 6, .net Core 3.1, Angular v12, Sql server, Kibana, Azure

ARROYO CONSULTING LLC:

(05/2021- 06/2022) as Full stack developer.

Responsibilities: I worked as a cloud systems developer in an Azure environment, operating under the Scrum methodology to ensure efficient and high-quality deliveries. In addition to evolutionary development, I contributed to the testing process, developed unit tests, and implemented clean architectures and design patterns.

technology stack: .Net core, React, SQL, Azure, Scrum.

DXC TECHNOLOGY:

(06/2020- 05/2021) as Sr Full stack developer in Universal Music Group Project.

Responsibilities: At DXC, I led the development and maintenance of a universal tool using .NET MVC and WPF technologies. I was responsible for making architecture improvements, providing support, and transferring knowledge to less experienced developers. My responsibilities included both front-end and back-end development, supporting QA team testing, implementing in cloud environments using AWS and Azure, as well as researching AWS services to simplify processes within the system.

technology stack: .Net, razor, HTML, CSS, .Net MVC, .Net WPF, SQL server, JavaScript, jQuery, cloud computing (AWS & Azure), entity framework 4.5., Azure

IDIOMS:

-  English (Avanzado)
B2+
-  French (inicial)
-  Italian(inicial)

OTHER SKILLS

- Problem solver
- Excellent resolution of technical problems.
- Comfort in front and back end development.
- Professional and personal use of Git.
- Implementations, Deployments.
- Use of current technologies.
- Use of unit tests.
- Easy code learning.
- Use of Requirements Engineering.
- Knowledge of Scrum.
- Use of design patterns.
- Use of algorithm.
- Use clean code
- Scrum

CERTIFICACIONES

- C# (IT Education)
- Javascript (IT Education)
- React (Education IT)
- Responsive (IT Education)
- Pre Certification: Met 70–61 SQL Sever (Microsoft)

ACADEMIC CAREER

- Awarded: UAI Inter–American Open University.
Title: Systems Engineering.
- Awarded: National Technological University (U.T.N.).
title: Web development.
- Awarded: ITI Superior San Judas Tadeo
Title: Higher Computer Technician (Complete)
- Awarded: ITI San Judas Tadeo Course
Title: Bachelor of Goods and Services (Complete)

ACCENTURE:

(09/2017- 06/2020) as **Tech Leader** - Banco Galicia project.

Responsibilities:I worked on the evolutionary development of various products using the MVC (Model-View-Controller) design pattern, collaborating in agile teams using the Scrum methodology. In addition to my development responsibilities, I also served as a technical lead, managing tasks for other developers and overseeing production deployments, quality control, and technical interviews for new IT resources. I participated in the evolutionary development of MVC systems, implementing new features and improvements based on client requirements and business needs.

technology stack: .Net, react, razor, HTML, CSS, sass, asp.net core MVC, ASP.net core Micro Services, entity framework 4.5, Azure

SYS BOX:

(09/2017 - 03/2018) as **Sr Full stack developer.**

Responsibilities: I collaborated on a technological project for a construction company, where I participated in the development of a materials purchasing management system for various construction projects. The system, hosted on Azure, utilized Dapper as the Object-Relational Mapping (ORM) tool. My responsibilities included front-end, back-end, and database development, with a focus on creating key functionalities for the project.

stack tecnico: .Net core, React, Sql server, SQL Server Reporting Services,azure,

TRANSCORE:

(07/2016 - 09/2017) as **Sr Full stack developer.**

Responsibilities: Worked on an international project in Transcore, collaborating on a product for North American use. Developed and maintained web systems configured in Azure. Responsible for bug fixing, modifying functionalities, and collaborating with the architect to choose the best architectural options offered by the company's archetypes.

technology stack: .Net core, Sql server, SQL Server Reporting Services,azure,

EYNES EMPIS SRL:

(05/2013- 06/2014) as **full stack developer**

Responsibilities: Developed and maintained a CRM (Customer Relationship Management) system named Odoo for a construction company. Developed functionalities for generating customized billing applications for clients, conducted testing and unit tests, and implemented in different environments. Also involved in investigating AWS services to simplify various processes within the system.

technology stack: MySQL, python, xml with CMR Odoo.

FREELANCE:

(08-2012 - 06/2021) as **Full Stack developer**

Responsibilities: Developed and maintained code for various clients, including the creation of responsive pages, site deployment, business logic generation, and event handling. Also responsible for database corrections and improvements. Worked predominantly with Entity Framework and Dapper, making medium to small modifications in Rest, MVC, and Web API applications. Typically utilized SQL Server or Oracle databases, and occasionally worked on website modifications or created websites from scratch.

technology stack: React, .net , SQL server, HTML, CSS, bootstrap, JavaScript, Nodejs, Mongo DB, SQL server, c#, entity framework, WordPress, Azure.
